

## FORESTRY & AGRICULTURE

We offer high-strength forged and machined components engineered for superior durability, minimising costly downtime for essential forestry and agricultural machinery.

We supply the forestry and agriculture industries with the forged, machined, and fabricated components that form the backbone of heavy machinery. In environments defined by constant stress and abrasive wear, component integrity isn't just a goal; it's a requirement.

From high-impact flails and tines to high-strength pins and hitch components, our forgings offer superior fatigue life and impact resistance. We make parts to withstand the relentless forces of logging, harvesting, and cultivation.

### EXAMPLES OF BESPOKE FORGED COMPONENTS

- Flails
- Tines
- Combine Fingers
- Chain Links & Pins
- Levers
- Brackets & Lugs
- Spindles & Yokes
- Bolting & Fasteners
- U-Bolts
- Clamps & Straps
- Clevis & Fork Ends
- Shackles
- Hooks
- Eye Bolts & Eye Nuts
