

Hollow Railings

Railheads are forged directly on to the tubes producing a ONE piece system

Maximise your potential by utilising Brooks Hollow Rail, an innovation in fencing manufacture. Railheads are forged directly on to the tube producing a unique ONE piece system.

The advantages of having a ONE piece system are:

- Less welding - up to 75% reduction in welding per panel.
- Less jiggling - one piece tube, no lining up of heads.
- Less cutting as tube is supplied to your pre-defined length.
- Less labour cost per panel.

Sizes Available:

- Round tube 20mm & 25mm.
- Square box section 20mm & 25mm.
- Wall thickness 2mm. Other sizes are available upon request.
- Lengths up to 3 metres. Cut to your requirements.

Improved appearance:

- No unsightly welding, smoother finish.
- Heads are always in line with the bar below.
- Attractive designs.
- Varying heights are easily achieved.

Up to 63% less weight than a solid bar which means:

- Reduced handling time and cost.
- Reduced carriage cost.
- Reduced finishing cost.
