

OFFSHORE & SUBSEA

We provide high-strength forged components engineered to withstand extreme pressures and corrosive conditions in demanding offshore and subsea environments.

We provide high-performance manufacturing solutions for the world's most demanding offshore and subsea environments. By combining advanced forging techniques with rigorous certification standards, we produce components including shackles, valve bodies, and connection fittings that excel under extreme pressure and corrosive conditions. Our commitment to precision ensures that every part we manufacture enhances the safety, resilience, and operational life of offshore infrastructure.

EXAMPLES OF BESPOKE FORGED COMPONENTS

- Bespoke Fasteners
- Tensioning Systems
- Lifting Eyes & Rings
- Hooks & Swivels
- Shackles
- Forged Elbows
- Tee Pieces
- Cross Fittings
- Valve Components
- Valve Bodies
- Yoke Forgings
- Bonnet Forgings
- Flanges
- Connectors & Hubs
