

PETROCHEMICAL

We deliver high-strength forged components engineered to ensure absolute containment and safety within volatile, high-pressure petrochemical applications.

We provide high-calibre manufacturing for the petrochemical sector's most punishing applications. From high-strength flanges to specialised valve bodies, forged components are designed to withstand corrosive chemicals and extreme temperatures.

We focus on metallurgical excellence and stringent certification to ensure every part contributes to the safety, environmental protection, and long-term efficiency of your facilities.

EXAMPLES OF BESPOKE FORGED COMPONENTS

- Eye Bolts & Eye Nuts
- Davit Arms
- Bespoke Fasteners
- Forged Elbows & Tees
- Cross Fittings
- Oblique Tee Pieces
- Flange Forgings
- Valve Components
- Bonnet Forgings
- Yoke Forgings
- Valve Bodies
- Cover Forgings
- Oblique Valve Bodies
- Open Die Forged Shapes
