

SHACKLES

We specialise in the manufacture of Standard and Bespoke Shackles to our client's exact specifications. Sizes Ranging from 6mm to 100mm diameter (1/4" to 4")

We are specialists in the production of hot-formed shackles using a combination of in-house upset forging, drop forging, bending, and machining processes. Our experienced team of engineers can design and produce bespoke tooling on-site, keeping the manufacturing process fully in-house.

Shackle bodies in round or square material up to 100mm thickness. **Non standards a speciality.**
