

TENSION SYSTEM COMPONENTS

We offer standard and bespoke solutions for Tension and Bracing Systems utilised in both modern construction and heritage restoration projects.

Brooks Forgings specialises in manufacturing and supplying components for tensioning and bracing systems in various materials and finishes. This includes clevis ends, turnbuckles, tie bars, and bracketry. In some cases, standard off-the-shelf items may not be suitable for a specific application. Therefore, we are committed to collaborating with engineers to create non-standard components that meet the project's unique requirements. **This is what we call the Brooks Difference.**

EXAMPLES OF TENSION & BRACING COMPONENTS

- Tie Bars
- Tension Rods
- Clevis Ends (Forged)
- Clevis Ends (Machined)
- Clevis Pins
- Fork Ends
- Spade Ends
- Eye Bolts
- Eye Rods
- Turnbuckles
- Couplers
- Bracketry
- Centre Plates
- Bolts & Nuts
