

TRANSPORTATION

We manufacture custom components engineered to meet the high-stress requirements of the global transportation and transit industries.

We manufacture the critical forged, machined, and fabricated components that underpin the global transportation industry. From mass transit to heavy goods vehicles, we specialise in high-stress parts including axle shafts, torsion bars, and suspension arms engineered to your exact specifications. By prioritising elite fatigue resistance and impact absorption, we ensure every component delivers the safety and longevity required for continuous, heavy-duty operation.

EXAMPLES OF BESPOKE FORGED COMPONENTS

- Stub Axles
- Wishbones
- Suspension Arms & Links
- Steering Arms
- Connecting Rods
- Rocker Arms
- Driveshafts
- Torsion Bars
- Gear Selector Forks
- Axle U-Bolts
- Brake & Clutch Levers
- Swivel Axles
- Towing Eyes
- Track Rod Ends
